RE: Documentation of Phone Conversation, Archeological Clearance for Rancho Equipment Services/Meadow Valley Contractors, Inc., Topaz Valley Limestone Quarry, M/023/022, Juab County, Utah

On December 7, 1994, I telephoned James Dykmann of the Utah State Historical and Preservation Office (SHPO) to discuss a recent letter received December 2, 1994, from the State Resource Development Coordination Committee (RDCC). In the letter, the SHPO recommended to the RDCC that an archeological survey be performed over the area encompassing the proposed expansion of the Topaz Valley Limestone Quarry. I called Mr. Rody Cox of the BLM, Warm Springs Resource Area on December 6th, to confirm that a Class III survey had already been performed by the BLM as part of their Environmental Assessment process. Rody confirmed that a January 23, 1992, archeological clearance had been performed and gave me the assigned SHPO number (U-92BL015B).

After relating this information to Mr. Dykmann, he rechecked their records and discovered an error in their computer plotted survey map. Apparently, the survey had been plotted a township off from the actual location. He indicated that the error would be corrected and that the survey was satisfactory. Mr. Dykmann advised me to subsequently ignore the RDCC letter requesting that a survey be performed. He asked if we needed a letter to that effect for our files. I told him I would draft a file memo documenting our conversation, which should suffice.
